April 10, 2002 -- Public Notice

In accordance with 40 CFR §124 Subpart B and 40 CFR §270.51 as adopted by Nevada Administrative Code (NAC) 444.8632, the Nevada Division of Environmental Protection (NDEP) gives notice that a renewal application was received in October 2001 from US Ecology Inc. The renewal application is for a permit to manage hazardous waste at their facility in Nye County, Nevada, 11 miles south of Beatty, Nevada. US Ecology operates a hazardous waste Treatment, Storage and Disposal (TSD) facility on an 80-acre site owned by the state of Nevada. In addition, the State leases a 400-acre buffer zone surrounding the 80-acre site from the U.S. Bureau of Land Management. The major changes associated with this renewal application are the construction of a new disposal trench and the addition of a waste pile for the management of soils within the boundary of an existing disposal trench.

This renewal application is available for public review at the NDEP-Carson City office, 123 W. Nye Lane, Room 120, Carson City, Nevada. Inquiries or requests to be included on the facility mailing list may be submitted to: Jon Taylor, Staff Engineer, Department of Conversation and Natural Resources, Nevada Division of Environmental Protection, Bureau of Waste Management, 333 West Nye Lane, Carson City, Nevada 89706-0851. The 21 EMI contact person is John wolf, (775) 575-2760.
